Mathematics

227 students did Mathematics.

Percentage doing Higher Level

The percentage of students doing Higher Level Mathematics was 12% greater than the percentage nationwide (51% versus 39%). This was an improvement on previous years, except for 2024 where the difference between School X and the national percentage doing Higher Level Mathematics was 21%.

Higher Level results

At Higher Level, the average CAO points received by students in School X in Mathematics was 2 (2%) higher than the national average (96 versus 94). This was a lower result than previous years, where the difference between School X and the national average CAO points was between 9% (9 points) and 16% (15 points).

The median grade was the same as the national median grade (H4). This was lower than previous median grades in Higher Level Mathematics.

3% of students received less than 40%, versus 5% nationwide. For the past number of years, the percentage of students receiving less than 40% has been less than the percentage nationwide each year.

Ordinary Level results

At Ordinary Level, the average CAO points received by students in School X in Mathematics was 3 (10%) higher than the national average (30 versus 33). As well as being greater than the national average CAO points in 2025, this has been a consistent result for previous years, with average CAO points exceeding the national percentage by between 3% (1 points) and 24% (8 points).

The median grade was one higher than the national median grade (O3 versus O4). This was lower than last years median grade (O3 versus O2).

5% of students received less than 40%, versus 7% nationwide. For the past number of years, the percentage of students receiving less than 40% has been less than the percentage nationwide each year.

Foundation Level results

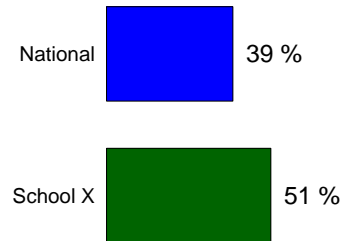

The median grade was two below the national median grade (F5 versus F3). This was lower than the 2024 median grade in Foundation Level Mathematics (F5 versus F2).

No students received less than 40%, versus 4% nationwide. No students have received less than 40% in Foundation Level Mathematics in previous years either, while the national percentage receiving less than 40% has ranged from 3% to 5% for the past number of years.

English

226 students did English.

Percentage doing Higher Level

The percentage of students doing Higher Level English was 10% greater than the percentage nationwide (87% versus 77%). This was an improvement on previous years, where the difference between School X and the national percentage doing Higher Level English was between -8% and 0%.

Higher Level results

At Higher Level, the average CAO points received by students in School X in English was 4 (6%) higher than the national average (75 versus 71). This was an improvement on previous years, except for 2024 where the difference between School X and the national average CAO points at Higher Level was 8%.

The median grade was one higher than the national median grade (H3 versus H4). This was an improvement or similar to all previous median grades in Higher Level English.

1% of students received less than 40%, versus 1% nationwide. For the past number of years, the percentage of students receiving less than 40% has been less than the percentage nationwide each year.

Ordinary Level results

At Ordinary Level, the average CAO points received by students in School X in English was 1 (3%) higher than the national average (30 versus 31).

The median grade was the same as the national median grade (O4). This was lower than last years median grade (O4 versus O2.5).

3% of students received less than 40%, versus 5% nationwide. This was an improvement on the previous year result (9%).

Irish

190 students did Irish.

Percentage doing Higher Level

The percentage of students doing Higher Level Irish was 6% less than the percentage nationwide (42% versus 48%). This was an improvement on previous years, except for 2024 where the difference between School X and the national percentage doing Higher Level Irish was 9%.

Higher Level results

At Higher Level, the average CAO points received by students in School X in Irish was 9 (12%) higher than the national average (83 versus 74). This was an improvement on previous years, where the difference between School X and the national average CAO points was between -13% (-10 points) and 7% (5 points).

The median grade was one higher than the national median grade (H2 versus H3). This was the same as last years median grade (H2).

No students received less than 40%, versus 1% nationwide. This was the first time in five years that no student has received less than 40% in Higher Level Irish.

Ordinary Level results

At Ordinary Level, the average CAO points received by students in School X in Irish was 8 (32%) higher than the national average (25 versus 33). This was an improvement on the previous four years, except for 2024 where the difference between School X and the national average CAO points at Ordinary Level was 50%.

The median grade was one higher than the national median grade (O3 versus O4). This was lower than last years median grade in Ordinary Level Irish but was better than previous years.

2% of students received less than 40%, versus 8% nationwide. This was similar to the previous year result (5%).

Foundation Level results

The median grade was one higher than the national median grade (F3 versus F4). This was lower than previous median grades in Foundation Level Irish.

No students received less than 40%, versus 7% nationwide. No students have received less than 40% in Foundation Level Irish in previous years either, while the national percentage receiving less than 40% has ranged from 5% to 7% for the past number of years.

174 students did Biology.

Percentage doing Higher Level

The percentage of students doing Higher Level Biology was 5% greater than the percentage nationwide (90% versus 85%). This was an improvement on previous years, where the difference between School X and the national percentage doing Higher Level Biology was between -17% and -7%.

Higher Level results

At Higher Level, the average CAO points received by students in School X in Biology was 5 (7%) higher than the national average (73 versus 68). As well as being greater than the national average CAO points in 2025, this has been a consistent result for previous years, except for 2021 where the difference between School X and the national percentage doing Higher Level Biology was -10%.

The median grade was one higher than the national median grade (H3 versus H4). This was lower than last years median grade (H3 versus H2). 6% of students received less than 40%, versus 12% nationwide. This was similar to the previous year result (3%).

Ordinary Level results

At Ordinary Level, the average CAO points received by students in School X in Biology was 5 (18%) below the national average (28 versus 23). This was a lower result than previous years, where the difference between School X and the national average CAO points was between -16% (-5 points) and 48% (11 points).

The median grade was the same as the national median grade (O4). This was lower than last years median grade (O4 versus O3).

18% of students received less than 40%, versus 6% nationwide. This was higher than the previous year result (0%).

Spanish

102 students did Spanish. This was the first year in the past five years that any student at School X did Spanish.

Percentage doing Higher Level

The percentage of students doing Higher Level Spanish was 7% greater than the percentage nationwide (87% versus 80%).

Higher Level results

At Higher Level, the average CAO points received by students in School X in Spanish was 7 (10%) higher than the national average (78 versus 71).

The median grade was one higher than the national median grade (H3 versus H4).

1% of students received less than 40%, versus 4% nationwide.

Ordinary Level results

At Ordinary Level, the average CAO points received by students in School X in Spanish was 10 (34%) higher than the national average (29 versus 39).

The median grade was one higher than the national median grade (O3 versus O4).

No students received less than 40%, versus 6% nationwide.

Geography

68 students did Geography.

Percentage doing Higher Level

The percentage of students doing Higher Level Geography was 10% greater than the percentage nationwide (94% versus 84%). This was an improvement on previous years, where the difference between School X and the national percentage doing Higher Level Geography was between -8% and 8%.

Higher Level results

At Higher Level, the average CAO points received by students in School X in Geography was 4 (6%) higher than the national average (74 versus 70). This was an improvement on previous years, except for 2024 where the difference between School X and the national average CAO points at Higher Level was 7%.

The median grade was one higher than the national median grade (H3 versus H4). This was the same as last years median grade (H3).

2% of students received less than 40%, versus 3% nationwide. This was higher than the previous year result (0%).

Ordinary Level results

At Ordinary Level, the average CAO points received by students in School X in Geography was 16 (52%) below the national average (31 versus 15). This was a lower result than previous years, where the difference between School X and the national average CAO points was between -21% (-7 points) and 53% (16 points).

The median grade was one and a half below the national median grade (O5.5 versus O4). This was lower than the 2024 median grade in Ordinary Level Geography (O5.5 versus O2).

25% of students received less than 40%, versus 3% nationwide. As well as being higher than the national percentage in 2025, this percentage was higher than the previous four years in School X.

History

53 students did History.

Percentage doing Higher Level

The percentage of students doing Higher Level History was 2% less than the percentage nationwide (77% versus 79%). This was a lower relative percentage than previous years, where the difference between School X and the national percentage doing Higher Level History was between 0% and 2%.

Higher Level results

At Higher Level, the average CAO points received by students in School X in History was 1 (1%) higher than the national average (73 versus 72).

The median grade was the same as the national median grade (H3). This was similar to all previous median grades in Higher Level History.

No students received less than 40%, versus 4% nationwide. For the past number of years, the percentage of students receiving less than 40% has been less than the percentage nationwide each year.

Ordinary Level results

At Ordinary Level, the average CAO points received by students in School X in History was 5 (19%) below the national average (27 versus 22). This was a lower result than previous years, except for 2022 where the difference between School X and the average national CAO points for Ordinary Level History was -21%.

The median grade was 0.5 below the national median grade (O4.5 versus O4). This was lower than the 2024 median grade in Ordinary Level History (O4.5 versus O1).

8% of students received less than 40%, versus 6% nationwide. This was the first time in five years that any student has received less than 40% in Ordinary Level History.

Home Economics

49 students did Home Economics. This was the first year in the past five years that any student at School X did Home Economics.

Percentage doing Higher Level

The percentage of students doing Higher Level Home Economics was 16% greater than the percentage nationwide (98% versus 82%).

Higher Level results

At Higher Level, the average CAO points received by students in School X in Home Economics was 7 (10%) higher than the national average (80 versus 73).

The median grade was the same as the national median grade (H3).

No students received less than 40%, versus 2% nationwide.

Ordinary Level results

At Ordinary Level, the average CAO points received by students in School X in Home Economics was 11 (35%) below the national average (31 versus 20).

The median grade was one below the national median grade (O5 versus O4).

No students received less than 40%, versus 4% nationwide.

French

43 students did French.

Percentage doing Higher Level

The percentage of students doing Higher Level French was 8% less than the percentage nationwide (70% versus 78%). This was a lower relative percentage than previous years, where the difference between School X and the national percentage doing Higher Level French was between -4% and 7%.

Higher Level results

At Higher Level, the average CAO points received by students in School X in French was 1 (1%) below the national average (71 versus 72). This was an improvement on previous years, except for 2024 where the difference between School X and the national average CAO points at Higher Level was 11%.

The median grade was the same as the national median grade (H4). This was lower than last years median grade (H4 versus H2).

No students received less than 40%, versus 3% nationwide. No student received less than 40% either in 2024. This was an improvement on previous years.

Ordinary Level results

At Ordinary Level, the average CAO points received by students in School X in French was 10 (37%) higher than the national average (27 versus 37). As well as being greater than the national average CAO points in 2025, this has been a consistent result for previous years, with average CAO points exceeding the national percentage by between 27% (7 points) and 55% (16 points).

The median grade was one higher than the national median grade (O3 versus O4). This was lower than last years median grade (O3 versus O2).

No students received less than 40%, versus 5% nationwide. No students have received less than 40% in Ordinary Level French in previous years either, while the national percentage receiving less than 40% has ranged from 4% to 8% for the past number of years.

Economics

36 students did Economics.

Percentage doing Higher Level

The percentage of students doing Higher Level Economics was 1% less than the percentage nationwide (89% versus 90%). This was an improvement on previous years, except for 2023 where the difference between School X and the national percentage doing Higher Level Economics was also -1%.

Higher Level results

At Higher Level, the average CAO points received by students in School X in Economics was the same as the average points received nationwide (73). This was a lower result than previous years, where the difference between School X and the national average CAO points was between 17% (13 points) and 34% (25 points).

The median grade was the same as the national median grade (H3). This was lower than previous median grades in Higher Level Economics.

3% of students received less than 40%, versus 4% nationwide. For the past number of years, the percentage of students receiving less than 40% has been less than the percentage nationwide each year.

Ordinary Level results

At Ordinary Level, the average CAO points received by students in School X in Economics was 9 (29%) below the national average (31 versus 22). This was a lower result than previous years, where the difference between School X and the national average CAO points was between 27% (7 points) and 55% (16 points).

The median grade was 0.5 below the national median grade (O4.5 versus O4).

No students received less than 40%, versus 5% nationwide. No students have received less than 40% in Ordinary Level Economics in previous years either, while the national percentage receiving less than 40% has ranged from 2% to 10% for the past number of years.

Physics

34 students did Physics.

Percentage doing Higher Level

The percentage of students doing Higher Level Physics was 9% greater than the percentage nationwide (94% versus 85%). This was an improvement on previous years, where the difference between School X and the national percentage doing Higher Level Physics was between -20% and -2%.

Higher Level results

At Higher Level, the average CAO points received by students in School X in Physics was 13 (19%) higher than the national average (83 versus 70). This was an improvement on previous years, where the difference between School X and the national average CAO points was between -5% (-4 points) and 14% (10 points).

The median grade was one higher than the national median grade (H2 versus H3). This was an improvement on previous median grades in Higher Level Physics.

No students received less than 40%, versus 11% nationwide. For the past number of years, the percentage of students receiving less than 40% has been less than the percentage nationwide each year.

Ordinary Level results

At Ordinary Level, the average CAO points received by students in School X in Physics was 18 (64%) higher than the national average (28 versus 46). This was an improvement on the previous four years, where the difference between School X and the national average CAO points was between 10% (-3 points) and 41% (3 points).

The median grade was two higher than the national median grade (O2 versus O4). This was similar to all previous median grades in Ordinary Level Physics.

No students received less than 40%, versus 14% nationwide. For the past number of years, the percentage of students receiving less than 40% has been less than the percentage nationwide each year.

DCG

34 students did DCG.

Percentage doing Higher Level

The percentage of students doing Higher Level DCG was 2% greater than the percentage nationwide (88% versus 86%). This was an improvement on previous years, except for 2024 where the difference between School X and the national percentage doing Higher Level DCG was 13%.

Higher Level results

At Higher Level, the average CAO points received by students in School X in DCG was 13 (17%) higher than the national average (88 versus 75). As well as being greater than the national average CAO points in 2025, this has been a consistent result for previous years, with average CAO points exceeding the national percentage by between 3% (2 points) and 19% (15 points).

The median grade was one higher than the national median grade (H2 versus H3). This was similar to all previous median grades in Higher Level DCG.

No students received less than 40%, versus 3% nationwide. No students have received less than 40% in Higher Level DCG in previous years either, while the national percentage receiving less than 40% has ranged from 2% to 3% for the past number of years.

Ordinary Level results

At Ordinary Level, the average CAO points received by students in School X in DCG was 3 (10%) below the national average (31 versus 28).

The median grade was one below the national median grade (O4 versus O3). This was an improvement on previous median grades in Ordinary Level DCG.

No students received less than 40%, versus 9% nationwide. No students have received less than 40% in Ordinary Level DCG in previous years either, while the national percentage receiving less than 40% has ranged from 8% to 9% for the past number of years.

German

31 students did German.

Percentage doing Higher Level

The percentage of students doing Higher Level German was the same as the percentage nationwide (81%). This was an improvement on previous years, except for 2024 where the difference between School X and the national percentage doing Higher Level German was 17%.

Higher Level results

At Higher Level, the average CAO points received by students in School X in German was 7 (10%) below the national average (64 versus 71). This was a lower result than previous years, where the difference between School X and the national average CAO points was between -3% (-2 points) and 13% (9 points).

The median grade was the same as the national median grade (H4). This was lower than last years median grade (H4 versus H3).

4% of students received less than 40%, versus 5% nationwide. This was higher than the previous year result (0%).

Ordinary Level results

At Ordinary Level, the average CAO points received by students in School X in German was 2 (7%) below the national average (29 versus 27). Although this was an improvement on the 2024 average CAO points versus the national average , it was lower than other previous years, where the difference between School X and the average CAO points received nationally in Ordinary Level German was between 10% (12 points) and 36% (12 points).

The median grade was the same as the national median grade (O4).

No students received less than 40%, versus 4% nationwide. For the past number of years, the percentage of students receiving less than 40% has been less than the percentage nationwide each year.

Construction Studies

25 students did Construction Studies.

Percentage doing Higher Level

The percentage of students doing Higher Level Construction Studies was 4% greater than the percentage nationwide (96% versus 92%). This was an improvement on previous years, where the difference between School X and the national percentage doing Higher Level Construction Studies was between -16% and -14%.

Higher Level results

At Higher Level, the average CAO points received by students in School X in Construction Studies was 10 (14%) higher than the national average (83 versus 73). This was an improvement on previous years, where the difference between School X and the national average CAO points was between 3% (2 points) and 11% (8 points).

The median grade was one higher than the national median grade (H2 versus H3). This was an improvement on previous median grades in Higher Level Construction Studies.

No students received less than 40%, versus 2% nationwide. No students have received less than 40% in Higher Level Construction Studies in previous years either, while the national percentage receiving less than 40% has ranged from 2% to 3% for the past number of years.

Ordinary Level results

At Ordinary Level, the average CAO points received by students in School X in Construction Studies was 13 (54%) higher than the national average (24 versus 37). As well as being greater than the national average CAO points in 2025, this has been a consistent result for previous years, with average CAO points exceeding the national percentage by between 36% (-3 points) and 71% (10 points).

The median grade was one higher than the national median grade (O3 versus O4). This was better than last years median grade (O3 versus O3).

No students received less than 40%, versus 13% nationwide. No students have received less than 40% in Ordinary Level Construction Studies in previous years either, while the national percentage receiving less than 40% has ranged from 12% to 20% for the past number of years.

Accounting

19 students did Accounting. This was the first year in the past five years that any student at School X did Accounting.

Percentage doing Higher Level

The percentage of students doing Higher Level Accounting was 10% greater than the percentage nationwide (84% versus 74%).

Higher Level results

At Higher Level, the average CAO points received by students in School X in Accounting was 6 (9%) higher than the national average (76 versus 70).

The median grade was one higher than the national median grade (H2 versus H3).

6% of students received less than 40%, versus 12% nationwide.

Ordinary Level results

At Ordinary Level, the average CAO points received by students in School X in Accounting was 2 (8%) higher than the national average (26 versus 28).

The median grade was the same as the national median grade (O4).

No students received less than 40%, versus 24% nationwide.

Engineering

16 students did Engineering.

Percentage doing Higher Level

The percentage of students doing Higher Level Engineering was 2% less than the percentage nationwide (88% versus 90%). This was an improvement on previous years, except for 2024 where the difference between School X and the national percentage doing Higher Level Engineering was 12%.

Higher Level results

At Higher Level, the average CAO points received by students in School X in Engineering was 15 (20%) higher than the national average (90 versus 75). As well as being greater than the national average CAO points in 2025, this has been a consistent result for previous years, with average CAO points exceeding the national percentage by between 6% (5 points) and 32% (24 points).

The median grade was one and a half higher than the national median grade (H1.5 versus H3). This was similar to all previous median grades in Higher Level Engineering.

No students received less than 40%, versus 2% nationwide. No students have received less than 40% in Higher Level Engineering in previous years either, while the national percentage receiving less than 40% has ranged from 1% to 2% for the past number of years.

Ordinary Level results

At Ordinary Level, the average CAO points received by students in School X in Engineering was 10 (37%) higher than the national average (27 versus 37). As well as being greater than the national average CAO points in 2025, this has been a consistent result for previous years, with average CAO points exceeding the national percentage by between 36% (-3 points) and 71% (10 points).

The median grade was one higher than the national median grade (O3 versus O4).

No students received less than 40%, versus 10% nationwide. No students have received less than 40% in Ordinary Level Engineering in previous years either, while the national percentage receiving less than 40% has ranged from 8% to 14% for the past number of years.

Computer Science

13 students did Computer Science. This was the first year in the past five years that any student at School X did Computer Science.

Percentage doing Higher Level

The percentage of students doing Higher Level Computer Science was 11% less than the percentage nationwide (77% versus 88%).

Higher Level results

At Higher Level, the average CAO points received by students in School X in Computer Science was 8 (11%) higher than the national average (79 versus 71).

The median grade was 0.5 higher than the national median grade (H2.5 versus H3).

No students received less than 40%, versus 5% nationwide.

Ordinary Level results

At Ordinary Level, the average CAO points received by students in School X in Computer Science was 3 (10%) higher than the national average (31 versus 34).

The median grade was the same as the national median grade (O4).

No students received less than 40%, versus 9% nationwide.

Applied Mathematics

10 students did Applied Mathematics.

Percentage doing Higher Level

The percentage of students doing Higher Level Applied Mathematics was 2% greater than the percentage nationwide (100% versus 98%). This was an improvement on previous years, where the difference between School X and the national percentage doing Higher Level Applied Mathematics was between -37% and -3%.

Higher Level results

At Higher Level, the average CAO points received by students in School X in Applied Mathematics was 5 (6%) higher than the national average (84 versus 79). This was an improvement on previous years, where the difference between School X and the national average CAO points was between -15% (-13 points) and -3% (-2 points).

The median grade was 0.5 higher than the national median grade (H2.5 versus H3). This was an improvement on previous median grades in Higher Level Applied Mathematics.

No students received less than 40%, versus 2% nationwide. No student has received less than 40% in Higher Level Applied Mathematics in the past five years either, except for 2021 where 3% received less than 40%, versus 2% nationwide.
